

ACI sustainability efforts unveiled at UN climate change conference

The American Concrete Institute (ACI), along with NEU: An ACI Center of Excellence for Carbon Neutral Concrete (NEU), made a key sustainability announcement in December at COP28 in Dubai, UAE. The announcement is part of a joint event with the Global Cement and Concrete Association.

ACI unveiled a new resource that soon will be available to the concrete construction industry.

The Conference of the Parties to the Convention, otherwise known as COP, is an initiative of the United Nations Framework Convention on Climate Change, and convened its 28th meeting at COP28 in Dubai.

COP has assembled member countries every year for nearly three decades to focus the world's attention on climate change, quantify changes, and determine programs and responsibilities to slow the increase of global temperatures.
