

Volume 54, 2009

Following is an index of all reports, papers, design-construction articles, and discussions that have appeared in the *PCI Journal* during the past year. This index is the 18th supplement to the *PCI Journal* 10-year and 25-year indexes, which comprehensively reference all reports, articles, and discussions published in the *Journal* from V. 1, No. 1, May 1956, to V. 36, No. 6, November–December 1991. Some back issues are available for download from the PCI website at www.pci.org.

Listed first is the author index, which includes, in alphabetical order, the names of all contributing authors for 2009, followed by the title, volume, number, date of publication, and page numbers for each report, article, or discussion. The material is then classified in chronological order under various subject categories.

Some recent back issues of the *PCI Journal* are still available. In addition, several of the more important articles are available in reprint form. In cases in which individual reprints are unavailable, copies of articles can be obtained for the cost of reproduction.
