FOR IMMEDIATE RELEASE

Precast/Prestressed Concrete Institute Elects Tom Kelley Chairman of the Board

President of Gage Brothers to serve as 2013 PCI chairman

CHICAGO – January 15, 2013 – The Precast/Prestressed Concrete Institute (PCI) has elected Tom Kelley, P.E., as its chairman for 2013. Kelley is president of Gage Brothers Concrete Products, Inc. in Sioux Falls, S.D.

“Besides being an innovator in both architectural and structural precast, Gage Brothers has been an active and supportive member of the Institute for many years,” said PCI President James G. Toscas, P.E. “We are fortunate to have an executive of Tom's caliber serve in such an important leadership position. He has already been making an impact on PCI.”

Kelley has been president of Gage Brothers since 2001. Prior to serving as president, he spent 30 years with the company in various other capacities. He has played an instrumental role in the company's evolution through ongoing strategic planning, sales strategy, and product research. His extensive contributions to PCI include sitting on numerous committees and serving in a chair capacity for the Architectural Precast Concrete Services and Manual Committee and the Budget Planning and Review Team.

“I look forward to serving as PCI's chairman in 2013,” said Kelley. “The Institute plays a large role in developing and promoting the body of knowledge for precast concrete. I appreciate the opportunity to further promote the Institute's mission and to make a difference in the coming year.”

In addition to his involvement with PCI, Kelley is an active member of PCI Midwest, the Sioux Falls Rotary Club, and the Sioux Falls Chamber of Commerce's Community Appeals Committee. He serves on several boards, including AltusGroup, Risk Administration Services, Lutheran Outdoors, and the Southeast Technical Institute Foundation. Kelley earned his bachelor's degree in civil engineering from South Dakota School of Mines and Technology in Rapid City and has been a licensed Professional Engineer in South Dakota for nearly 30 years.

About PCI

Founded in 1954, the Precast/Prestressed Concrete Institute (PCI) is the foremost developer of standards and methods for designing, fabricating, and constructing precast concrete structures. PCI also operates the world's leading certification program for firms and individuals in the precast concrete structures industry. Institute members include firms comprising the precast concrete structures industry as well as architects, consultants, contractors, developers, educators, engineers, materials suppliers, service providers, and students.

PCI develops, maintains, and disseminates the industry's body of knowledge and publishes a broad array of periodicals, technical manuals, reports, and other informational documents, including an award-winning technical journal. Additionally, PCI offers a variety of continuing education options, technical conferences, conventions, exhibitions, and awards programs. For more information, visit www.pci.org.
