

President's Message

Meet Me in St. Louis!

Now is the time to make plans to attend the October 30-November 1 PCI Convention in St. Louis. The 1977 program promises to be one of the finest we have ever assembled.

For the first time there will be a "Chief Executive Officers' Round Table" covering, in depth, vital management concerns. This will serve a need long recognized by the Institute and its members. There are only a limited number of spaces available, so it is imperative to pre-register now.

Another major highlight of the Convention will be the "Seismic Design Seminar," directed to architects and engineers. In this three-part seminar a step-by-step procedure will be given for designing a high rise precast prestressed building to meet Zone III earthquake design criteria.

The detailed Convention program is given in this issue of the PCI JOURNAL. We strongly believe we have come up with a program which will appeal to a broad range of interests, and provide a lively forum for the interchange of new ideas and practical knowledge.

If you have not already registered, please use the forms on the following two pages.

Meet me in St. Louis!
