

Suzanne Aultman

Harry Gleich

Metromont Promotes Two in Engineering Department

For Immediate Release

Greenville, S.C., July 11, 2022 -- Metromont is pleased to announce the promotion of Harry Gleich to Senior Vice President of Engineering and Suzanne Aultman to Vice President of Engineering.

“Harry has been one of the most innovative minds in the precast industry over the past 40 plus years. His contributions to Metromont and to our industry are unparalleled.” said Rick Pennell, President and CEO. “As we look forward to Harry’s eventual retirement, we are thankful to have someone as qualified and as passionate about our industry as Suzanne Aultman be able to lead our corporate engineering function in the future. Both promotions are well deserved and long overdue.”

Harry Gleich joined Metromont in 1986 as Chief Engineer and has become an industry-renowned expert in the field of precast concrete engineering. Harry has been honored as a “Titan of the Industry” by the Precast/Prestressed Concrete Institute (PCI), providing exceptional contributions to our industry, demonstrating outstanding leadership and service in innovation, and in advancing the growth of the precast industry.

Suzanne has been with Metromont for 19 years quickly making her mark as a trusted source for all things engineering and as a mentor for young engineers. Suzanne is a PCI Fellow and was the inaugural award winner of the Irwin J. Speyer Young Professional Engineer Award presented by PCI. This award was established to recognize young engineers who not only excelled technically but also excelled in serving their communities and their fellow engineers. Suzanne is heavily involved in ACI standards development and was most recently recognized as 2021 Engineer of the Year for the Piedmont Chapter of the South Carolina Society of Professional Engineers.

Metromont was founded in 1925 on the principles of faith, honor, and passion, and 96 years later, those values are still the foundation of who we are and everything we do. A third-generation company with nearly 1,500 associates across six manufacturing facilities in South Carolina, Georgia, Florida, and Virginia, Metromont is a leader and pioneer in the engineering and manufacturing of precast concrete. Most of all, we're a trusted partner, working side-by-side with our customers from the earliest stages of project design through turnover of the completed structure.

In addition to the production of precast concrete, Metromont provides our customers with complementary design and engineering, hauling, erection, and field services to support their full construction needs. Across the eastern seaboard, the southeast, and even as far west as Arizona, our customers rely on us to provide innovative precast solutions and the best quality for their parking structures, data centers, multifamily housing, office buildings, warehouses, schools, and stadiums.
