Appendix: Precast Concrete–to–Precast Concrete Facade Joints Using Precompressed Expandable Foam

Edward S. Farrington, Tom Anderson, Leon Grant, and Rita Seraderian

This appendix contains additional figures for “Precast Concrete–to–Precast Concrete Facade Joints Using Precompressed Expandable Foam,” by Edward S. Farrington, Tom Anderson, Leon Grant, and Rita Seraderian, which appears on pages 80–91 in the November–December 2019 issue of PCI Journal.

**Figure A.1.** Test configuration of detail 2A: precompressed foam with sealant detail for solid panel. Note: 1" = 1 in. = 25.4 mm.

**Figure A.2.** Test configuration of detail 3B: precompressed foam with sealant and backer rod detail for insulated panel. Note: 1" = 1 in. = 25.4 mm.
**Figure A.3.** Test configuration of detail 4A: dual sealant and backer rod (control) detail for solid panel. Note: 1" = 1 in. = 25.4 mm.
