PCI of ILLINOIS & WISCONSIN MEMBERSHIP INFORMATION

PCI of Illinois & Wisconsin

is a chapter of the Precast/Prestressed Concrete Institute (PCI) with producer members in both states.

Our goal is to promote and educate about the benefits of precast concrete design and construction. We provide a variety of resources to the design, architecture, engineering, real estate and construction professional. PCI-IW's programs include seminars, trade shows, education services, plant tours and many other activities.

Benefits of Membership

PCI-IW opens its membership beyond those who produce precast/prestressed products and invites companies that supply goods and services to our industry to join us. We recognize the importance of the many companies and products that make the precast industry one of the most vital and exciting construction fields today.

As a member of PCI-IW, your company will play an important part in the growth of the precast industry. Not only does your participation in the association give you unprecedented access to our members and our programs, it gives you the opportunity to work with the largest and most creative precasters in the region. Other benefits include:

- Opportunity to present product information to producer members
- Exhibit space at industry seminars
- Listing on the PCI-IW website
- Email newsletter detailing association events and news
- Referral or speaking engagement opportunities
- Learning opportunities such as sustainable design, project management and other programs
- Networking opportunities

St. Louis Prestress

Glen Carbon, IL

Stonecast Products, Inc.

Germantown, WI

Illini Concrete Company of Illinois

Tremont, IL

Utility Concrete Products, LLC

Morris, IL

Types of Membership

There are three classes of membership in PCI-IW. Any reputable individual or firm engaged or interested in the plant-produced precast and prestressed concrete industry as a producer or supplier of materials or services is eligible to apply.

Producer: A firm or division of a firm with a manufacturing facility engaged in the production of plant produced precast and prestressed concrete. Cost for producer members varies.

Associate: Any individual or firm engaged in supplying goods, services, and information critical to the manufacturing, delivery, or erection of precast and prestressed products. Businesses that usually provide these materials to multiple members are considered associate members. Precast marketing representatives who join the association must have a producer member as a client. Examples of typical associate members include erection contractors, steel manufacturers, prestressing equipment manufacturers, engineering firms, and others. Cost for an associate member is \$1000 annually.

If you have questions about your status as a member please contact PCI-IW at 312-505-1858 or info@pci-iw.org.
